To Whom It May Concern:

PRODUCER STATEMENT

The epiROOF® system is an EPDM membrane used for a variety of roofing and decking applications. EPDM membranes have had extensive international use since the 1960's and are regarded as excellent exposed waterproofing membranes.

Waterproofing Systems Ltd confirms that when applied in accordance with our published specifications the epiROOF® system will provide a watertight membrane. We further confirm that this system conforms to NZBC B2.3.1(b) and is durable for 20 years.

The durability of the epiROOF® system has been independently verified by BRANZ to be in excess of 20 years. The current Certificate Number is 533 (2006).

Waterproofing Systems Ltd issues the material warranty at the completion of the installation and on completion of our QC process. The subcontractor is responsible for issuing the workmanship warranty.

Yours sincerely,

John Stallard
Technical Director
