

Roof Drains

Genius Drains

The roof drain "genius" models is manufactured of a special compound of thermoplastic rubber, it is highly resistant against low temperatures (cold flexibility=-40°C.) The "Genius" roof drains are the only drains in the world with a special circular row of holes and through these holes the waterproofing membrane torched over its flange is totally blended with the membrane below.

Dimensions						
	Ø External	A	D1	D2	D3	H
1	82 mm	320	69	75	68	250
2	110 mm	380	95	101	95	250

Specification:

250 mm long spigots are provided with two couples of anti-infiltration tongues that prevent the possibilities of infiltration between the spigot and the drain pipe.
