To Whom It May Concern:

PRODUCER STATEMENT

The Polyflame torch-on membrane system is an APP modified bitumen membrane used for a wide variety of waterproofing applications including below-ground tanking. Polyflame has been used extensively around the world for both roofing and tanking applications since 1984.

Furthermore, Polyflame manufacture is covered by an ISO 9002 Quality Management Certification.

Waterproofing Systems Ltd confirms that when applied in accordance with our published specifications the Polyflame system will provide a watertight membrane. We further confirm that this system conforms to NZBC B2.3.1(b) and is durable for 50 years provided it is covered and protected from UV exposure, and protected from mechanical damage.

Waterproofing Systems Ltd issues the material warranty at the completion of the installation and on completion of our QC process. The subcontractor is responsible for issuing the workmanship warranty.

Yours sincerely,

John Stallard
Technical Director
