To Whom It May Concern:

PRODUCER STATEMENT

The Synroof Hi-Build liquid applied acrylic membrane system is used for a wide variety of waterproofing applications including trafficable decks.

Waterproofing Systems Ltd confirms that when applied in accordance with our published specifications the Synroof trafficable deck system will provide a watertight membrane. We further confirm that this system conforms to NZBC B2.3.1(b) and is durable for 15 years. Depending on the extent and nature of the traffic on the membrane, recoating may be required every 5 years.

Waterproofing Systems Ltd issues the material warranty at the completion of the installation and on completion of our QC process. The subcontractor is responsible for issuing the workmanship warranty.

Yours sincerely,

John Stallard
Technical Director
